INSTRUCTIONS TO PURCHASERS

Orders. Orders should be sent in just as soon as possible after receiving catalog. By placing orders early you are more certain of getting the varieties wanted, as late in the season we are often sold out of some varieties. If ordered early we can reserve the stock until proper time for planting.

Shipping. We have adequate shipping facilities and can ship in any direction with the probability of prompt arrival at destination. All shipments travel at the cost and risk of the purchaser.

Truck Deliveries. Truck load orders will be delivered free, reasonable distances; long hauls and smaller orders delivered by special arrangement. We are well equipped to make prompt delivery.

Guarantee and Claim. All stock is guaranteed to be true-to-name, dug properly, and in good condition when shipped. Any tree or plant which is untrue to name will be promptly replaced. In case of any error on our part, it is mutually agreed between the purchaser and ourselves that we shall not at any time be held responsible for a greater amount than the original price of the nursery products.—As we have no control over its care and usage after it leaves our hands, we cannot guarantee it to live and grow or to give specific results.—We insist that all claims for damaged or unsatisfactory stock be made promptly.

Terms Cash, except when expressly agreed otherwise.

Substitution. We reserve the right in case we are out of a variety, to substitute another of equal merit when it can be done—unless the order is plainly marked NO SUBSTITUTION. In this case we will fill the order as completely as possible and refund the balance of remittance, if paid in advance.

Prices. The prices quoted in this catalog are F. O. B. our Nurseries except where otherwise noted. They are as low as was consistent at the time of printing, considering wages and other costs. However, they are subject to change without notice.

How to figure your order for quantity rates:

Fruit Trees

- 1 to 9 trees (any assortment) at each rate.
- 10 to 49 trees (any assortment) at 10 rate.

WAYNE COUNTY ORANGE. A superior new variety. Extra large, golden yellow, of excellent quality. Good cropper.

SWEET CHERRIES

(Budded on Mazzard Root)

Our cherry trees are grown on soil adapted for growing good thrifty trees.

Sweet cherry are all budded on Mazzard seedlings, which has been proven the best understock for the sweet cherry.

We take special care to have our varieties true to name and during the growing season we endeavor to keep our trees in the best condition by spraying with a fungicide spray. We have had very good success by using Bordeaux Mixture. If you have had trouble to grow cherry trees, may we suggest that you try this method.

American Holly

Perhaps it was three hundred years ago when the holly tree pictured above began to grow. For approximately three centuries it has grown. This tree, located near York Furnace, in the southern part of York County, has become the largest known specimen of its kind in this latitude. It is estimated to be 75 feet high, with a circumference at the base of about 65 inches and with a two-foot diameter. In 1935, through the efforts of the Conservation Society of York County, a suitable marker was placed at the base of the tree.
